In March 2019 Optometrist Katrina French joined Peter and the Visique Team. Katrina is Peter's niece and she is the 5th generation to join the practice as an Optometrist. She is very experienced having previously worked as an Optometrist in Alice Springs, Australia. Katrina looks forward to seeing you soon in the Dunedin or Mosgiel practice.

In our Dunedin rooms we have one of the latest Topcon OCT Analysers. This state of the art machine allows microscopic analysis of the eye for early signs of glaucoma, macular degeneration and other conditions in far more detail than seen conventionally.

We now have the Topcon Corneal Topographer in Dunedin. It gives 3D maps of your cornea shape, wave front analysis of your vision and infrared imaging of eyelid glands. Both Peter and Katrina are Dry Eye and ocular surface disease specialists.

Peter and Katrina are both therapeutically qualified, which allows them to prescribe medication and treat red, irritated eyes. Peter and Katrina have also become Board Approved Optometrist Glaucoma Prescribers allowing them to independently manage Glaucoma.

We believe you come to us for the best eyecare and eye wear available. That's why if you need new glasses we recommend Essilor lens designs and coatings for the best possible vision and durability. They are world leaders in lens technology, spending 200 million dollars annually on research. We have lens options to fit all budgets plus a great range of the latest frames, sunglasses & contact lenses.

Glasses+Sunglasses: Total Eyecare 2 Pairs Everyday

When you buy clear prescription glasses, you'll save hundreds on an equally important pair of prescription sunglasses – now from just \$299* on many trendy frames.*Sunglass frame & non Polarised prescription sunglass lenses in same lens type including progressive. Polarised \$80 extra.
